

Making Terra Cotta Luminaries

When working through the terra cotta, it is best to wear the terra cotta away with a less aggressive, more frequent pass.

What you'll need:

	Dremel 200 Series		Silicon Carbide Grinding Stone 4,8mm		Tungsten Carbide Cutter pointed tip 3,2mm
--	--------------------------	---	---	---	--

Other Supplies:

- 3" or 4" Terra Cotta Pot
- Votive Candle
- Pencil or Marker

Step by step direction

Step 1

On the terra-cotta pot, draw or trace your design with a marker or pencil.

Step 2

With the 9903 tungsten carbide cutter, carefully cut out your design. Recommended speed: 35.000 rpm.

Step 3

Use a silicon carbide grinding stone, such as the 84922, to smooth the edges. Recommended speed: 35.000 rpm.

Step 4

Insert a votive candle in the pot to decorate your entryway, patio or garden.
